### SUMMARY

In our economic analysis of this matter, we estimate the cumulative present value of Mr. Benjamin Blutstein's earnings had he not been killed on July 31, 2002, to be **\$693,931**. Future earnings are calculated to present value, based on U.S. dollar amounts in the year 2013. We have provided these projected earnings analysis to assist the trier of fact in this matter, which may attribute a portion of such amount as a loss to the estate of Benjamin Blutstein.

In calculating the above-noted earnings projections, it is assumed that, had Mr. Blutstein lived out his statistical life expectancy, he would have returned from Israel to reside in the United States and by January 2004 would have obtained employment as a drug counselor. His earnings were projected to the end of his mother's statistical life expectancy.

If the family of Mr. Blutstein incurred, or will incur, any unreimbursed medical and/or funeral expenses not considered herein, such costs would raise our estimate.

If the family of Mr. Blutstein received, or will receive, any income not considered herein for mitigation of these earnings, such monies would reduce our estimate.

We have not considered recovery of Mr. Blutstein's pain and suffering, nor that of his family.

We reserve the right to amend our report, upon request, should we receive new relevant information.
